Quality Assurance services

Rapid implementation

Project life cycle and project management

Global implementation

Packaged methodology

Highly successful track record

Project acceleration

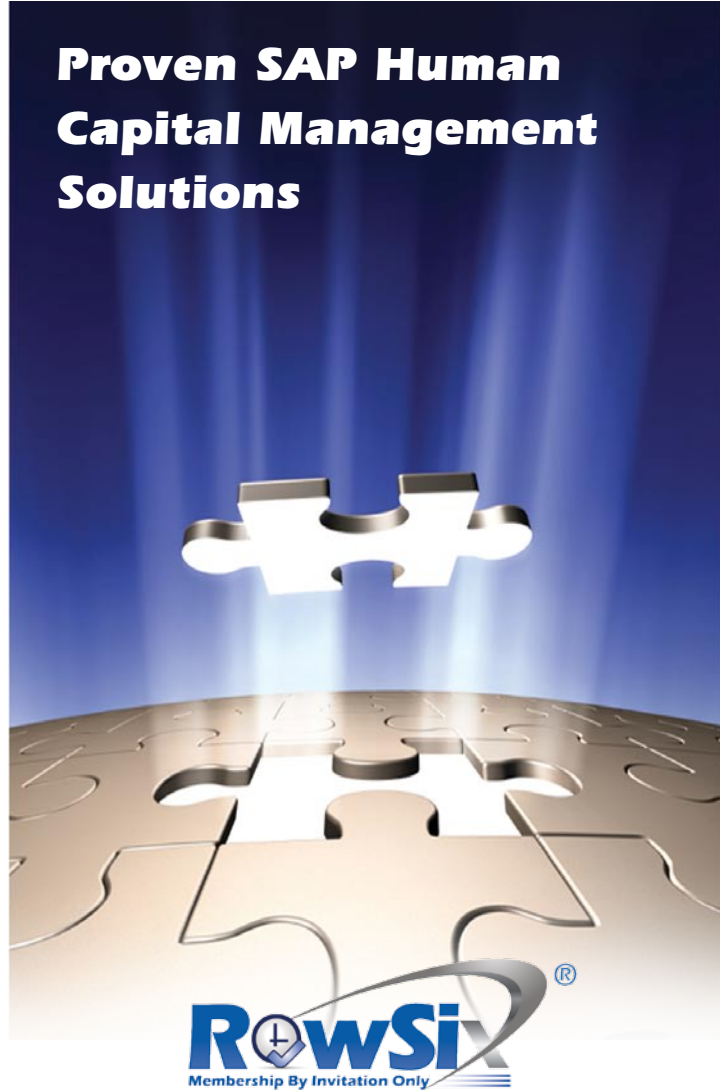

## RowSix ... the solution to your SAP HCM requirements.

### SAP ... two requirements for success:

- 1. SAP software** ... it works, proven by countless implementations ... don't be blinded by cheap, low-end resources.
- 2. Expertise** ... successful implementation results from experienced expertise ... which RowSix provides with guaranteed value.

**System integrators** ... SAP co-CEO Apotheker says the 'model has to change' ... we agree, if that means the people have to change ... because only elite quality consultants can deliver successful results on time and within budget. Beware of pretenders trying to sell quality at a bargain price ... RowSix is the source of cost effective experience and quality.

**The Big 4 is not the best answer** ... while the Big 4 may seem to be a safe and secure decision, make your SAP implementation decision based on quality, knowledge, service, and successful track record ... all of which RowSix provides without the inflated rates of the Big 4.

RowSix is a consulting and systems integration firm focused exclusively on the implementation and support of SAP Human Capital Management (HCM). Our mission is to reduce the cost, speed the delivery, and improve the effectiveness of SAP implementations. We accomplish this with expert teams of highly skilled SAP specialists together with a business-focused implementation approach. We emphasize using the right talent for the assignment, innovation, and implementing effective, practical results.

RowSix was formed by three platinum SAP HCM consultants. This multi-national group brought together a unique combination of expertise: decades of high level SAP R/2 and R/3 implementation and more than 60 years of IT and HR process. As we have grown, we have carefully added consultants who meet extremely high standards of expertise and successful implementation experience ... and we have become the SAP HCM module consultant's consultants.

## RowSix ... the leader, defining the state of the SAP HCM art.
